

RMS-1500 PACKAGE

The RMS 1500 Modular Package comes pre-plumbed and ready to install for your rainwater harvesting project. This package is designed for below-ground installation.

The ***RMS 1500 Modular Package*** includes:

- **WISY WFF150 Vortex Fine Filter** with extension tube, mounted to tank
- One **1,500-gallon** Roth polyethylene tank with risers, gaskets, manhole covers, bulkhead fittings
- **4" Smoothing Inlet**
- **Multi-function Overflow Device**
- **Goulds 1HP 1SC Pump** with 2" Coarse Floating Filter with 7' of food-grade suction hose
- **Normally Open float switch** for pump protection
- **20 gallon pressure tank** with tank tee package
- Necessary tank gaskets, bulkheads, and fittings

TANK NOTES

1. Access at or above grade level must be secured against unauthorized access.
2. Tank is not rated for vehicular traffic loading.
3. All resin used is compliant with ASTM D 1248 as required by CSA B66 and IAPMO / ANSI Z1000-2007.
4. Tank material of construction is HMW-HDPE.
5. Primary dimensions are in inches
6. Minimum tank wall thickness is 1/4".
7. Labeling will include: manufacturer name, liquid capacity, date, maximum burial depth, and model number.
8. Riser cover contains the following: 6" x 3" warning:
"Danger - Do not enter - Poison Gas" - written in English, French & Spanish.
9. Maximum burial depth from manufacturer is 36" unless specifically instructed otherwise by the factory.
10. Models RMT-750, RMT-1060, RMT-1250 and RMT-1500 are all certified to CSA and IAPMO standards.
11. Models RMT-500, RMT-900 and RMT-1000E are compliant with CSA and IAPMO standards.

TANKS FOR THE
NEXT GENERATION

ROTH MultiTank® and FRALO Septic Tank
High tech. High quality. High time.

Call 866-943-7256 or visit our web site at www.roth-usa.com

ROTH MultiTank® **NEW!**

Manufactured for you by the same exacting standards and same certifications as our FRALO brand tanks, Roth has set the bar even higher with the new Roth MultiTank®. The only tank you will ever need.

ROTH MultiTank® Features

- **Multi Usage**

For water cistern, pump, holding, rain-water or septic tank

- **Multi Layer:**

Inner layer of FDA approved virgin HDPE, two inside layers of PE for improved stability, plus one outer layer of black and UV-stabilized PE

- **Multi Coverage**

Lifetime* Corrosion Protection and 5 years of Labor Insurance Coverage**

Our multi-layered tank construction, consisting of virgin material surrounded by 3 layers of protection.

* Lifetime is the expected service life. See warranty for details.

** Coverage on workmanship and product cost, which includes the replacement and excavation of tank, up to \$2,500. This is subject to proper installation according to Roth's installation manual and the installer must be certified by a Roth Representative. Please contact us for more information on joining our elite group of certified installers.

ROTH GLOBAL PLASTICS, INC. BLOW-MOLDED TANKS

High tech. High quality. High time.

Not all tanks are created equal.

Roth's revolutionary process changes everything.

High Tech

State-of-the-art computer controlled multi-layer blow molding process produces perfect parts. Repeatable process, repeatable field performance you can trust.

High Quality

This is not your father's tank.

Roth tanks are the finest money can buy... and tens of thousands do!

High Time

After decades of conventional technology, Roth brings 35 years of blow molding experience to the North American market. In fact, 1 out of every 2 tanks in Europe is of blow-molded construction.

FRALO Septic Tanks by ROTH

Setting the standard for all other septic tanks, the FRALO tank by Roth offers undisputed best-in-class status and the highest brand recognition of any tank in the market.

FRALO Brand Septic Tank Features

- First-generation blow-molded septic tank
- IAPMO and CSA certified (selected models only)
- High brand recognition

FRALO brand septic tank by ROTH Global Plastics, Inc.

WHY ROTH? WHY BLOW MOLDING?

Environmentally Sound

- 100% of scrap is recycled and reused
- The most environmentally-sound methods available (no air, water or solid waste discharge as a result of our process)

Less Worries

- No cracking
- No corrosion
- Watertight
- Higher life expectancy
- Strongest poly tank on the market
- HDPE — the most chemically-resistant material in the world
- True structural integrity
- Quality of tanks are above European standards

Roth Riser System STAR®

Easier Handling

- Lightweight
- Simple, user-friendly installation
- No water backfill required
- Multi-port inlet/outlet
- Versatile — suitable for septic and pump applications
- Roth offers all accessories to complete a whole system, including the popular STAR® riser systems (left)

**SUPERIOR PRODUCTS.
ENVIRONMENTALLY-FRIENDLY PROCEDURES,
MATERIALS AND INNOVATIONS.
YOUR ENVIRONMENT IS OUR BUSINESS.**

- "Water Shortage will Leave World in Dire Straits" (www.USAToday.com)
- "Drought afflicts much of the nation" (www.Greatlakesdirectory.org)
- According to the NCDC (National Climate Data Center),
"2007 was the 6th warmest summer on record, with 2000 new daily high temperatures records across the southern and central US. Drought affected almost half of the US". (www.ncdc.noaa.gov)
- "Cities reward lifestyle that conserves water" (USAtoday.com)

Water shortage, mandatory water restrictions and conservation... these are serious issues that are getting discussed on a daily basis. Our contribution as a company is to develop and offer products that help deal with issues like it.

Our mission is to continuously search for better ways to produce our products and invent new products that are both efficient and environmentally friendly. We continuously invest in machinery and R&D to increase efficiency and decrease the usage of non-replenishable resources.

VORTEX FILTER

WISY WFF 150 VORTEX FINE FILTER

The **WFF 150 Vortex Fine Filter** is used where multiple downspouts are connected together by a single conveyance pipe that gravity feeds the vortex filter. The WFF 150 Filter can filter rainwater to **280 microns** from a collection area up to **5,500 square feet**. The WFF 150 Filter can be installed above or below ground to meet your rainwater harvesting needs.

Below are the dimensions and the specifications for the WFF150 Vortex Fine Filter:

(Dimensions in parentheses are millimeters)

WFF150 VORTEX FILTER

FILTER DIMENSIONS
(WITHOUT TOP)

FILTER INSERT

LIFTING HANDLE

Regularly Furnished:
Polypropylene Filter Housing, Upper Ring, Housing Lid, Stainless Steel Fine Mesh Filter, and 11.5" Stainless Steel Lift Handle.

Additional Components Available:
Extension Tube, 25" or 39" Lifting Handle, Blind Insert, Seepage Basket, Stainless Steel Wall Bracket, Fixing Set.

All measurements are converted from metric to standard. Some pipe connections may take a coupling to connect the filter to standard pipe sizes.

Installation Note:

- All Vortex Filters must be installed level and plumb for proper operation. Straight pipe with minimum length of 40" must be plumbed into the filter inlet for proper calming area.

Rainwater Management Solutions
1260 W Riverside Drive
Salem, VA 24153

FUNCTION: The WISY WFF 150 Vortex Pre-Filter is used where multiple downspouts are connected together by a single conveyance pipe that gravity feeds the vortex filter to remove debris or particulate larger than 280 microns. The WFF 150 can be installed above or below ground – indoors or outdoors. An appropriately sized drain must be provided for the 6” outlet of the Vortex Filter for both indoor and outdoor installations. Because the Vortex Pre-Filter is part of the conveyance system used to remove rainwater from a roof area the filter must be sized according to flow rates to ensure safe roof drainage is achieved. See the Flow Rate Table below to determine the correct size filter for your rainwater harvesting system.

Table for max flow rates using the WISY Pre-Filter System, according to DIN EN 12056*:

The maximum flow rates apply for a conveyance system with a max slope of 1% and a max pipe fill level of 70%.	WFF100:	66 GPM
	WFF150:	202 GPM
	WFF300:	1,277 GPM

The WISY WFF 150 Vortex Filter is the only commercial vertical filter made in the world and provides the highest quality of rainwater with minimal maintenance. Because of the vertical design, the filter has a self cleaning effect so dirt and debris are discharged from the filter along with excess water necessary to carry debris to storm or grade.

Because the filters works on capillary action, there are no baskets to clean or additional sprayers that require water and electricity necessary to “rinse” the filter. The filter should be inspected two to three times a year to ensure the natural flow of water in the filter is not obstructed. The stainless steel filter inserts need to be cleaned once or twice a year by hand cleaning with a mild detergent and soft brush. Depending on the debris filtered, additional cleanings may be necessary to maximize efficiency.

EFFICIENCY of the WISY PRE-FILTER SYSTEM

WISY estimates the average efficiency of the WFF 150 Vortex Pre-Filter is 90% which applies to 99% of precipitation events in Germany and Central Europe. Although the precipitation rates and events vary across the United States the efficiency (hydraulic efficiency) chart shown below shows the efficiency of each of the Vortex Pre-Filter.

Smoothing Inlet

WISY SMOOTHING INLET (4")

The **4" WISY Smoothing Inlet** is an all stainless steel device that fits on the 4" inlet pipe in the storage tank. It is used to prevent the agitation of sediment at the rainwater inlet into the storage tank. The smoothing inlet also helps aerate the water as it enters the tank. The inlet pipe rests in the inner diameter of the smoothing inlet. The smoothing inlet should rest on the bottom of the tank.

Below are the dimensions and the specifications for the WISY Smoothing Inlet:

(Dimensions in parentheses are millimeters)

PART NUMBER: EB0300US

Rainwater Management Solutions
1260 W Riverside Drive
Salem, VA 24153

Overflow Device

The 4" **WISY Multi-function Overflow Device** is connected to the overflow pipe within the storage container or cistern. The multi-functional overflow device is made of impact-resistant ABS plastic that eliminates drain odors in the tank, provides vermin and backflow protection, and skims surface debris. Device comes with support strut, clamp, and fits 4" overflow piping.

Below are the dimensions and the specifications for the WISY Overflow Device:

(Dimensions in parentheses are millimeters)

PART NUMBER: US1002

Rainwater Management Solutions
1260 W Riverside Drive
Salem, VA 24153

Floating Filter

The **WISY Floating Filter** will take water from just below the surface. Water at this depth is of the highest quality in the tank, because any particulate that enters the tank either floats on the surface or settles to the bottom.

The floating filter consists of a polyethylene ball and stainless steel filter and is supplied with a standard 7 ft. length of food-grade suction hose. The nozzle connections are available in 1 1/4" and 2" sizes. The filter is available separately or as part of a kit for both submersible and booster pumps. Hose lengths greater than 7 feet are available through RMS.

COARSE FLOATING FILTER

Coarse filter housing with 1.2 mm mesh

SIZE	PART NUMBER
1"	SZ9927+
1-1/4"	SZ9928+
2"	SZ9991+

FINE FLOATING FILTER

Fine floating filter housing with 0.3 mm mesh

SIZE	PART NUMBER
1-1/4"	SZ9936+
2"	SZ9931+

Regularly furnished: Stainless Steel Floating Filter, Polyethylene Float Ball, 7' Long Food-Grade Suction Hose

Submersible Pump

ITT

Residential Water Systems

Goulds Pumps

1SC Submersible
Water Pump

FEATURES

- **Casing:** AISI 304 SS. Corrosion resistant, non-toxic, non-leaching.
- **Impeller:** FDA compliant, glass filled Noryl®. Corrosion and abrasion resistant.
- **Mechanical Seal:** Silicon/carbide sealing faces; all metal components of AISI type 300 stainless steel running in protected oil chamber.
- **Elastomers:** BUNA-N.
- **Motor Shell and Lifting Handle:** Constructed of AISI type 304 series stainless steel.
- **Shaft:** AISI type 304 stainless steel high strength keyed pump shaft with impeller locking cap screw.
- **Discharge:** 1 1/4" NPT vertical discharge connection.
- **Suction Strainer:** Detachable for easy clean out.

GOULDS PUMPS

Goulds Pumps is a brand of ITT Corporation.

Engineered for life

ITT

GOULDS PUMPS Residential Water Systems

APPLICATIONS

Submersible water pumps designed for pumping out of reservoirs and storage tanks:

- Homes and farms
- Mobile home parks and motels
- Schools and hospitals
- Municipal applications
- Industrial applications
- Commercial applications

SPECIFICATIONS

Pump:

- 1 1/4" NPT discharge and open suction.
- Maximum suspended solids 1/8".
- Capacities: to 35 U.S. GPM (7.9 m³/h).
- Total heads: to 240 feet TDH (70 m).
- Temperature:
104°F (40°C) continuous
140°F (60°C) intermittent.

- Maximum submergence: to 65 feet (20 m).

- Continuous duty rated, non-overloading motor.

Motor:

- Single phase: 3450 RPM, 115 and 230 V, 60 Hz.

- Three phase: 3450 RPM, 230 V, 60 Hz.

- Non-overloading.

- Class F insulation.

- Thermal overload protection: built-in with automatic reset on single phase.

- Three phase models require external overloads in panel.

- Power cord: All 30' long.

Single phase – 16/3, with 115 V or 230 V plug

Three phase – 16/4 ST0, bare leads

NOTE: See accessory section for separate control panels.

Float Switch

SJE SIGNALMASTER® Control Switch

Mechanically-activated, narrow-angle float switch designed to activate pump control panels and alarms.

This narrow-angle sensing device is used to accurately monitor liquid levels in:

potable water
water
sewage applications

The SJE SignalMaster® control switch is not sensitive to rotation.

➔ Normally Open Model (high level) Model 1002715

The control switch turns on (closes) when the float tips slightly **above** horizontal signaling a high level, and turns off (opens) when the float drops slightly below horizontal.

Normally Closed Model (low level)

The control switch turns on (closes) when the float tips slightly **below** horizontal signaling a low level, and turns off (opens) when the float tips slightly above horizontal.

FEATURES

Passed NSF Standard 61 protocol by an approved Water Quality Association laboratory.

Mechanically-activated, snap action contacts.

High impact, corrosion resistant, polypropylene float housing.

Not sensitive to rotation.

Control differential of 1.5 inches (4 cm) above or below horizontal.

UL Listed for use in water and sewage.

CSA Certified.

Three-year limited warranty.

OPTIONS

This switch is available:

CE certified unit available upon request.

for normally open (high level) applications or normally closed (low level) applications.

in standard cable lengths of 10, 15, 20, or 30 feet and 3, 5, 6, or 10 meters (longer lengths available)

with two mounting options that allow for flexibility in installation:

Mounting Clamp: for applications where the switch can be attached to a discharge pipe or similar mounting device.

Externally Weighted: for applications where the switch can be suspended from above.

SPECIFICATIONS

CABLE: flexible 18 gauge, 2 conductor
(UL, CSA) SJOW, water-resistant (CPE)

FLOAT: 2.74 inch diameter x 4.83 inch long
(7.0 x 12.3 cm) high impact, corrosion resistant, polypropylene housing for use in sewage and water up to 140°F (60°C)

MAXIMUM WATER DEPTH: 30 feet (9 meters), 13 psi (90 kPa)

ELECTRICAL: 5 amp, 125/250 VAC, 50/60 Hz

NOTE: This switch is not recommended for controlling:

electric loads less than
100 milliamps, 12 VAC
non-arcing electric loads
