

The Rainwater Management Solutions **Submersible Level Sensor** is an easy-to-install analog tank level measuring device. The stainless-steel transducer rests 4-6" from the bottom of the tank and is scalable up to 26 ft (8m) in depth. Can be used in both above-ground or below-ground installations.

P/N: RMS-SLS-0420-036F-08M

Technical Specifications:

- Stainless Steel Submersible style level transducer
- 24VDC Input
- 4-20mA Output
- 36' cable length provided
- 26' (8m) maximum installation depth
- Integrates with RMS **Level Easy™** Level Monitor, RMS 200, or RMS 200 Mini Controllers

note: **Level Easy™** Level Monitor can be placed remotely, Submersible Level Sensor cable should be extended to monitor unit
