

The **WISY Extension Tube for WFF100/WFF150** is used to bring the filter lid to a minimum of 4" above grade to prevent surface water from entering the filter. Trim off excess with a saw. Screw lid onto the extension with the provided stainless steel screws. For deeper depths, a maximum of three (3) extension tubes can be used. The polyethylene extension tube is 20" in height and fits onto both the WFF 100 and WFF 150 Vortex Filters.
